About —

I've worked as a professional web developer for 9+ years in digital and marketing agencies.

My journey began in Australia, where I studied graphic design and started my career. I moved to Leeds at 25 and currently work at IMA as a Senior Front-end Developer.

I'm well rounded and diverse in my skills, capable of both front-end and back-end development.

Front-end is my strength - coding creative and user-friendly websites with HTML, CSS and JavaScript. I know React very well and have extensive experience building websites with Next.js and Gatsby. I can integrate with APIs (RESTful, GraphQL), write back-end scripts in Node.js or PHP, and comfortably work with infrastructure like AWS and Vercel.

Additionally, I have experience with a variety of CMS, such as WordPress, Strapi, and Shopify.

Work Examples —

See my portfolio for examples of recent work:
